# Installation instruction

1

Rotate the ceiling box counterclockwise and remove it from the lamp body
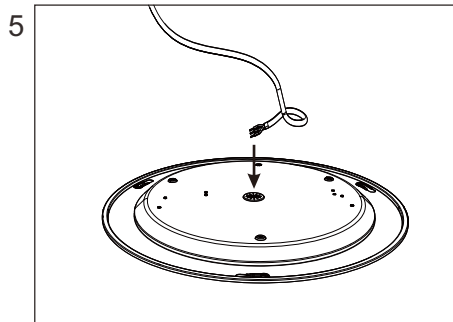

2

Separate the terminals

3

Φ280mm

Drill three matching holes evenly in a 280mm diameter circle on the ceiling according to the size of the expansion screw plugs used.

4

Install the expansion screw rubber plug (Gecko)

5

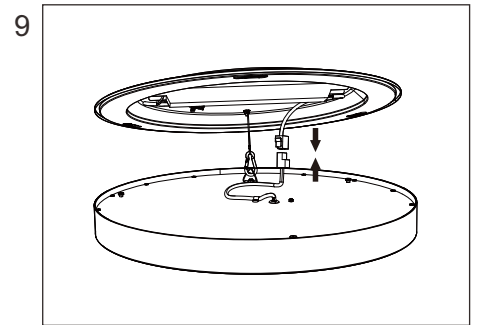

Thread the wires through the hole in the middle of the ceiling box.

6

Secure the ceiling box to the ceiling with 4mm diameter screws.

DA

Connect the cable (make sure the power is off, AC200-240V).
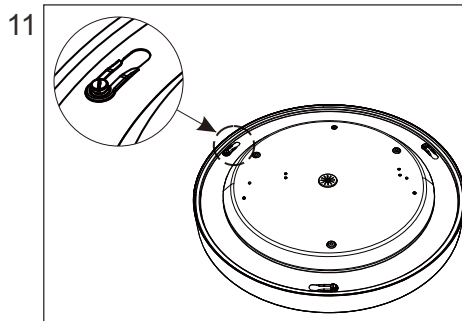

8

Attach the safety rope to the wire rope of the lamp body

9

Pair the terminals

10

Align the three screw caps on the lamp body with the holes on the ceiling box and rotate them clockwise (about 10°) until they can no longer rotate.

11

If the lamp body becomes slightly loose when pushed upward, it means it has been rotated in place.

12
